

Your expert in Ventilation Systems since 1995

## AIR FLOW FILTERS SOLUTIONS

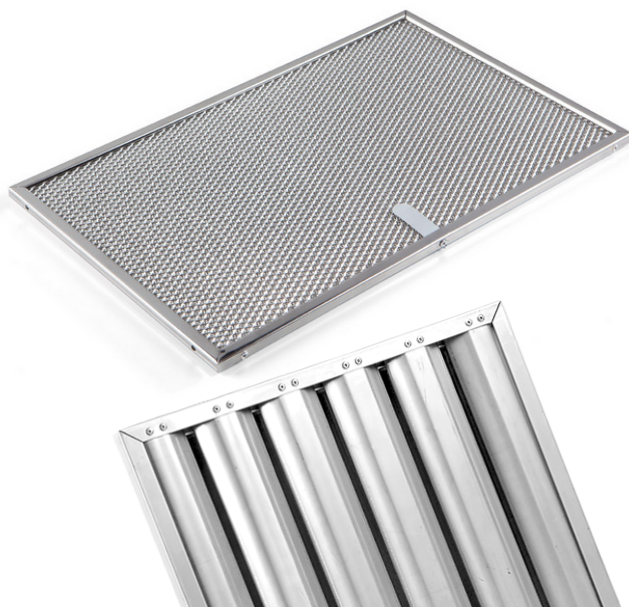

At **SDI Ventilation Group**, we advise, supply and can install filters at preferential rates negotiated with our selected manufacturers.

To increase the efficiency of the air flow renewal, it is important to **REPLACE** your Air Handling Unit (AHU) filters regularly.

### WHY DO WE NEED TO CHANGE FILTERS REULARY ?

1. To improve air circulation.
2. To avoid the proliferation of bacteria.
3. To protect your Air Handling Unit (AHU) engine.
4. To recover oily mist more effectively.
5. To clean clogged duct systems.
6. To improve the quality and safety of your installations overall.

*We recommend that you change your filters once a year.*

### SDI Ventilation offers you :

- Personalised inspection by appointment.
- Quicks intervention by our team of qualified technicians.
- Complete report with photos before and after the intervention.
- Certificate issued after the invoice is settled.
- Day and night intervention.

## HOW DO WE CHANGE YOUR FILTERS ?

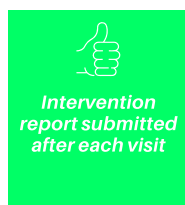

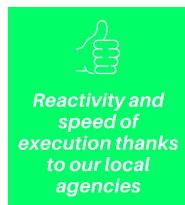

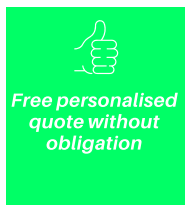

### *The SDI Ventilation methodology*

- A Complete audit of your installations is carried out in order to propose a suitable upkeep and maintenance solution.
- We supply and install suitable filters.
- We install access doors on ducts network every 10 feet.

During his visit, you can ask the technician any questions.  
*Their training and experience are entirely at your disposal free of charge.*
