## PROFESSIONAL KITCHENS CANOPY GREASE REMOVAL

**At SDI Ventilation Group, we specialise in Eco-Steam grease removal solution for our extraction networks : Commercial kitchen Canopy - Filters - Ducts (In & Out) - Extraction fans**

**To improve and maintain a high level of hygiene in your kitchen, your extraction system must be CLEANED**  
A well-maintained kitchen a canopy guarantees the efficiency of your equipment !

### WHY CLEAN THE NETWORK ?

Carrying out regular interventions by our expert teams will allow you :

1. To comply with legislation in force.
2. To ensure the safety of all your staff and the public, reducing potential fire hazard
3. To improve the air quality and hygiene of your premises: eliminating odours, polluting particles, preventing the threat of runs and stains on walls and false ceilings.
4. To make your equipment last longer and more cost effective.

**All installations for extracting air polluted by greasy fumes must be maintained at least once a year.**

### SDI Ventilation offers you :

- Personalised inspection by appointment.
- Quicks intervention by our team of qualified technicians.
- Complete report with photos before and after the intervention.
- Certificate issued after the invoice is settled.
- Day and night intervention.

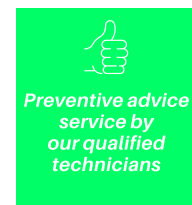

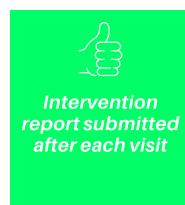

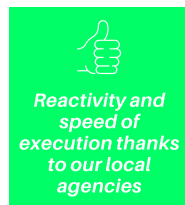

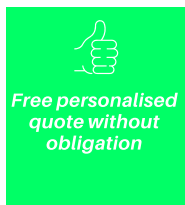

# HOW DO WE GO ABOUT CARRYING OUT AN INTERVENTION ?

## The SDI Ventilation methodology

- Protection of your equipment and their surroundings with a single-use polyene plastic sheet
- Protection of all electrical points and surroundings
- We set up "access doors" every 10 feet to degrease the entire network from the hood to the extractor fan
- Visual inspection of tightness and emptiness parts of the ducts
- Pictures taken "BEFORE" the maintenance starts
- We remove grease filters and check their condition
- Grease removal by Eco steam on the inner and outer parts of the canopy
- Grease removal of extraction sheaths by Eco steam
- Eco steam the extraction turbine and inspect motor and fan usage
- Extractor fan usage checks
- Clean and strip by Wet Steam and recycle waste
- Degrease and re-apply grease filters
- Degrease drain channels floors and surrounding walls
- Disinfect all surrounding furniture
- Disinfect the entire extraction system by Dry Steam
- Dry the canopy in & out and finish by spraying a dry finishing lacquer
- Pictures taken "AFTER" the maintenance has been completed
- Waste and consumables are recycled
